

WCAworld Academy Good Distribution Practice Certified Training Course

WCAworld understands the importance of helping to ensure that speciality logistics are handled in the right way. Profit margins are higher for successful shipments, but also, the pitfalls and losses of non-qualified forwarders making mistakes that can be avoided can reach millions of dollars.

If you are moving medicinal products or even medical devices, it is imperative that you handle the goods in the correct and compliant way.

We firmly believe in and promote a completely transparent supply chain for pharmaceutical products. Not only do we have a responsibility to the end user patients, but, also to that of the forwarding community that look to the WCAworld for guidance.

Join us at our WCAworld Academy good distribution training session which over 1000 Dedicated members have now taken!

GDP Certificated Training Certificate
Course Length 1 day @ \$395.00 USD/Person

Suitable for all logistics personnel
Open to all WCAworld attendees

Course content:

- Introduction to Pharmaceutical Logistics
- Good Distribution Practice and Good Manufacturing Practice
- The Chapters of GDP
- Temperature Controlled packaging
- Supply Chain Security
- Risk Assessments
- Auditing

Course Objectives:

- Develop a quality management approach to all areas within the distribution of Medicinal Products for Human Use.
- Understand key challenges the logistics industry faces with regards to GDP.
- Demonstrate understanding of Healthcare products and Temperature and Time sensitive products.
- How to create a compliant supply chain and the process involved such as SOPs & SLAs.
- Recognize the regulatory bodies and respective guidelines globally for GDP for Medicinal Products for Human use.

This course also includes workshops which enhance learning by discussing how GDP relates to processes and job roles. It equips each attendee with a strong understanding of how they will need to implement GDP and why compliance is important.
